

# SUMMER SOLSTICE

## A Celebration of Light & Fire

Depending on the year June 19 - June 23

The Summer Solstice is the longest day of the year!  
Celebrating the flowers in full bloom and the power of the sun.

We have a solstice fire, burning away that which no longer serves us,  
While celebrating the flower of our lives and encouraging it's fruition.

May years we picked up trash and held hands around Lake Tahoe,  
Honoring this powerful day.

Let the light shine!
